

TOWN LINE SOLAR AND STORAGE PROJECT • SULLIVAN COUNTY, N.Y.

60-DAY NOTICE OF INTENT TO FILE AN APPLICATION

RWE Solar Development, LLC (RWE), is proposing to construct the Town Line Solar and Storage Project, a major electric generating facility under Article VIII of the Public Service Law. This notice announces that on or about May 29, 2026 RWE will file an Application pursuant to Article VIII seeking a permit from the Office of Renewable Energy Siting and Electric Transmission (ORES) authorizing the construction and operation of the Facility. The Renewable Action through Project Interconnection and Deployment (RAPID) Act and its implementing regulations at Article VIII of the Public Service Law, (16 NYCRR Part 1101) provides for the review of major renewable energy facilities in New York State and establishes a unified proceeding rather than requiring a developer to apply for numerous state and local permits. The uniform standards and conditions are available at 16 NYCRR 1101-3 and <https://dps.ny.gov/ores-regulatory-documents>.

The Town Line Solar and Storage Project, is a 200-megawatt (MW) utility-scale solar photovoltaic energy generation and 100 MW energy storage facility proposed to be located in the Towns of Thompson and Forestburgh in Sullivan County, New York (the "Facility"). The purpose of the proposed Facility is to generate solar-powered electricity that will provide a significant source of renewable electricity to the New York State power grid. Under the 2019 Climate Leadership and Community Protection Act, New York State has committed to generating all electricity from renewable sources by 2040. The proposed Facility will help New York achieve that mandate. The Facility will include the installation and operation of solar panels, together with the associated electrical collection lines (below ground), battery energy storage system, access roads, meteorological towers, operation and maintenance (O&M) building, and collector substation. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Coopers Corners to Rock Tavern 345-kilovolt (kV) transmission line, owned and operated by New York Power Authority (NYPA). Upon completion, the ownership of these NYPA Facilities will be transferred over to New York Power Authority.

For more information about the Facility, please visit the Facility website at <https://cleanenergyforsullivan.com/> or the ORES website at <https://dps.ny.gov/ores-permit-applications>, matter number 24-03035, or contact RWE at:

RWE Solar Development, LLC

connor.roth@rwe.com

Upon filing the Application, RWE will provide funding in the amount of \$200,000 to be deposited into a local agency account to be made available to local agencies and potential community intervenors for the purpose of contributing to a complete record leading to an informed permit decision as to the appropriateness of the site and the facility, and for local agencies, shall include the use of funds to determine whether a proposed facility is designed to be sited, constructed and operated in compliance with applicable local laws and regulations.

Any local agency or potential community intervenor shall submit a request for initial funding **within thirty (30) days of the date of application filing** and such requests can be made to general@ores.ny.gov or Attention: Request for Local Agency Account Funding, c/o: OGS Mailroom, Office of Renewable Energy Siting and Electric Transmission, Empire State Plaza, Agency Building 3, Albany, NY 12223.
