

Commissioner's July 2025 report to Public Safety and Law Enforcement Committee

Good morning everyone. Summer is in full-swing, and as expected the emergency services folks throughout the County are exhibiting remarkable dedication in serving their neighbors.

- We are putting into operation Phase I of the Government Critical Infrastructure Security Plan this month, which will include our new Building Security Monitor starting July 28th, along with additional deputies in advance of the roll-out of the new weapons detection system in early August. Informational messaging for employees will be disseminated by the Director of Communications in the lead-up to our start date
- With help from ITS we continue to bolster our technological capabilities for field operations
- The Sheriff hosted a pre-summer law enforcement meeting, which was well-attended and provided an opportunity to exchange concerns and ideas to make this summer as enjoyable and safe as possible for the communities across the County
- We participated in a safety marketing campaign with Hatzollah, and I am proud to say the end product was remarkably well done and informative
- We will be working with Sullivan West School District to look into the school bus stop-arm camera program
