

I'd like to know when this legislature is going to start acting like a royal court instead of a bunch of pawns on Mr. Potosek's chess board. I'm talking about the Adult Care Center. Since Mr. Potosek stated in 2019 that it was just too difficult for him to manage our county owned nursing home, we've hired Infinitecare as consultants, but they are in fact totally managing the facility, illegally. Mr. Potosek got a nice big raise this year from you but the tiles on the ACC dish room floor are still broken. We've had a 1 star rating there for over a year now. Since the Survey team left a few weeks ago, there have been several incidents, one being that an over 100 year old lady was dropped and her leg was broken. How did that happen? We have staff working there who are so high that they're falling off their chairs, and I'm talking about yesterday. Your investigation won't find this in any report, except that somebody went home sick. Ms. Huck has stated that there is an ongoing investigation into staff drug use, but I really don't have faith in her investigatory powers or whatever happens to any reports to the compliance committee, as she has been an integral part of enabling Infinitecare in their illegal activity and relieving Mr. Potosek's workload from the very beginning. The corruption and incompetence of county management starts at the top and goes all the way down. What are you waiting for to help the disabled residents at the ACC? Thank you.
